

Day 06 Homework

Graphing Absolute Value & Linear Inequalities

Name _____

Date _____ Block _____

1-9: Graph each inequality. Do not use the calculator!

1. $y \leq -3$

2. $x > 2$

3. $y > -3(x - 4) + 5$

4. $y < -5|x - 2| + 5$

5. $y < \frac{1}{2}|x+4| + 1$

6. $y \geq -2(x - 1) + 2$

7. $x - 3y \leq 6$

8. $y > |x| - 1$

9. $y > -3|x + 1| - 2$

10. **COMPUTERS** A school system is buying new computers. They will buy desktop computers costing \$1000 per unit, and notebook computers costing \$1200 per unit. The total cost of the computers cannot exceed \$80,000.

- Write an inequality that describes this situation.
- Graph the inequality.
- If the school wants to buy 50 of the desktop computers and 25 of the notebook computers, will they have enough money?

Review of Transforming Functions: Given the following formula: $f(x) = a | x - h | + k$

- * a is what causes the graph to _____.
- * h causes the function to shift _____.
- * k causes the function to shift _____.
- * Your starting point is always _____.

Write the function for each of the following graphs using the formula above. Take the parent function and apply the transformation to write your equation.

11. $f(x) =$ _____.

12. $f(x) =$ _____.

13. $f(x) =$ _____.

14. $f(x) =$ _____.

15. $f(x) =$ _____.

16. $f(x) =$ _____.
